- Poor communication

AUDIENCE

- Project Team
- Project Leads
- Network Admins

COURSE OBJECTIVES

- Use Jira Software Cloud to support selected Agile practices
- Use Jira Software Cloud to track progress, identify and address issues, and manage team collaboration

- Use Jira Software Cloud's reporting and analytics tools to measure team performance and identify areas for improvement
- Use Jira Software Cloud to support Agile practices and workflows in a distributed or remote team
- Manage an Agile project using Jira Software Cloud

METHODOLOGY

This program will be conducted with interactive lectures, PowerPoint presentations, discussions, and practical exercises.

COURSE CONTENTS

Module 1: Introduction to Agile Mindset and Jira

Covers the basic concepts of the Agile mindset and how it can be applied to software development projects. It also introduces Jira Software, a popular project management tool used in Agile methodologies

Module 2: Agile Principles

Covers the twelve principles of Agile software development, including customer satisfaction, continuous delivery, and self-organizing teams

Module 3: Agile Methodologies

Provides an overview of popular Agile methodologies, including Scrum, Kanban, and Lean. It also covers the key roles and ceremonies in each methodology

Module 4: Jira Software Fundamentals

Covers the basics of Jira Software, including creating and managing projects, issues, and boards. It also covers how to customize Jira to fit your team's needs

Module 5: Agile Project Management with Jira

Covers how to use Jira Software to manage Agile projects, including creating and managing sprints, backlogs, and releases. It also covers how to use Jira Software to track team progress and report on project status.

Module 6: Jira Project Simulation

Hands-on experience in managing an agile project from start to finish using Jira. Using a project simulation, learners will apply key agile principles and practices to plan, execute, and deliver an Agile product/outcome in a simulated environment
