

AGILE CERTIFIED PRACTITIONER WITH EXAM PREP

(AS-106)

Duration: 4 days; Instructor-led | Virtual Instructor-led

WHAT YOU WILL LEARN

- Delivered by Atlassian Community Leader
- Pre-Training Baseline Agile Awareness Survey
- 60 Days WhatsApp Support
- Simulated online test bank with over 500 Questions

Benefits in Participating:

- Alignment with business
- Delivery Predictability
- Engaged stakeholders
- High-performing teams
- Improved Productivity metrics
- Improved Quality
- Improved Visibility of Outcomes
- Improved Adaptability
- Lower risks
- Satisfied Customers

Loss in Not Participating:

- Difficulty in managing change
- Inability to manage expectations
- Increased cost due to rework and delays
- Inability to manage VUCA circumstances
- Lack of clear goals and priorities
- Lack of collaboration
- Poor/Negative outcome
- Poor morale and performance
- Poor communication

AUDIENCE

Project Team Members seeking Certification.

COURSE OBJECTIVES

- Apply agile principles and mindset within the context of the project team and organization.
- Explain how to deliver valuable results by producing high-

value increments for review, early and often, based on stakeholder priorities.

- Explain how to engage current and future interested parties by building a trusting environment that aligns their needs and expectations.
- Explain how to create an environment of trust, learning, collaboration, and conflict resolution that promotes team self-organization.
- Explain need for an evolving plan, from initiation to closure, based on goals, values, risks, constraints, stakeholder feedback, and review findings.
- Explain how to identify problems, impediments, and risks and prioritize to resolve them in a timely manner.
- Explain how to improve the quality, effectiveness, and value of the product, the process.
- Attempt certification type questions to prepare for the PMI-ACP exam using an automated online test bank.

METHODOLOGY

This program will be conducted with interactive lectures, PowerPoint presentations, discussions, and practical exercises.

COURSE CONTENTS

Module 1: Introduction & Overview

An introduction to the course and an overview of Agile and its benefits for project management.

Module 2: Agile Principles & Mindset

Agile Manifesto, principles, and mindset, and how they differ from traditional project management

Module 3: Value-Driven Delivery

Deliver value to customers through techniques such as prioritization, frequent delivery, and feedback loops.

Module 4: Stakeholder Engagement

Techniques for engaging and collaborating with stakeholders,

including user involvement, continuous communication, and transparency.

Module 5: Boosting Team Performance Practices

Techniques for building and motivating high-performing Agile teams, including servant leadership, empowerment, and continuous improvement.

Module 6: Adaptive Planning

Techniques for Agile planning, including adaptive planning, incremental delivery, and responding to change.

Module 7: Problem Detection & Resolution

Techniques for identifying and resolving problems and impediments in Agile projects, including root cause analysis, continuous improvement, and retrospectives.

Module 8: Continuous Improvement

Covers the importance of continuous improvement in Agile projects, including techniques such as retrospectives, and metrics-based monitoring.

Module 9: In-class Exam-Simulation with Live Test Bank

Attempt certification-type questions in-class to boost competency, capability and confidence of test-takers in undertaking PMI-ACP

Module 10: Post-Training Exam-Simulation with Live Test Bank

Attempt certification-type questions during post-training to boost competency, capability and confidence of test-takers undertaking PMI-ACP
